Client Testimonials

“Our aim is to provide friendly, impartial and professional advice that is backed up by a wealth of experienced technical staff that are capable of dealing with every eventuality”.

Ray Anderson.

Managing Director.

OUR COMMITMENT

Our commitment to quality and customer service is second to none.

Classic Security Solutions specialise in the design, installation and maintenance of all types of quality electronic security systems - Whatever your security needs - we have the solution.

In today's world, security, whether personal or for an organisation is no longer an option, it's a necessity.

Security demands serious attention.

Rapid technological advances mean there is now a vast array of sophisticated security systems available and we at Classic will help you choose the right systems to best suit all your security requirements.

As a discerning client you know that installing the most advanced, technologically superior security products is only effective when partnered with the best quality assured backup, support and service available.

*quality and service
we will be there for you 24 hours a day, 365 days a year*

020 8507 7771
www.classicUK.com

OUR COMMITMENT

Our **“one-stop shop”** takes the whole security management task off your shoulders, relieving you of the burden and saving you time and money. Our quality assured management, service and support team are here to ensure you always get the personal attention you deserve. We will keep all your security systems up to date and in peak condition and arrange servicing and maintenance when necessary, allowing you to concentrate on more important tasks.

By choosing Classic you can rest assured that you will receive impartial friendly advice, cost-efficient installation and flexibility - plus back-up on which you can **always rely**.

Only professional security engineers of the highest calibre can join our team. All are highly experienced and our ongoing training program ensures that they remain fully conversant with the latest advances in security technology.

We continue to play a leading role in the establishment and management of the modern apprenticeships national training initiative within the security industry. We provide and maintain security systems for an array of prestigious clients including local authorities, government departments, premiership football clubs, celebrities, power stations, schools, retail chains, hospitals, architects, electrical contracts and individual homes.

INTRUDER ALARMS

A crucial element when considering having an alarm system installed is to ensure that you choose a security installation company that is **NSI** (*National Security Inspectorate*) **gold accredited** and **BSIA** (*British Security Industry Association*) **Registered**.

All our alarm systems are NSI gold approved.

A quality installation of the kind installed by Classic Security Solutions will ensure an efficient security system all year round. A poorly installed alarm system can mean many false alarms, which are a nuisance and will inevitably end up being ignored.

The best protection against crime is prevention, and once armed with a sophisticated Classic intruder alarm, criminals know your premises are well protected. The Alarm systems can secure your premises and property with not one, but two types of highly effective protection. We call it perimeter protection and interior protection. Both can be used together or separately. Depending on the level of security you need and your budget.

*your peace of mind is our business
the best protection against crime is prevention*

INTRUDER ALARMS

All under control

The control panel is the heart of your security system. We will place it in a discreet location away from prying eyes. Whatever the size of your organisation, the control panel processes all the information sent to it by the systems sensors and alerts our Alarm Receiving Centre who will contact company members, key holders and emergency services when applicable.

Personal attack buttons can be incorporated into the alarm system for even **greater peace of mind**.

We can provide panic buttons (permanently fixed or waterproof and wearable) monitored by our Alarm Receiving Centre. Classic Security Solutions provide **Security you can trust**. We only install the most reliable and advanced products available, all backed up with our NSI gold approved, **quality assured** comprehensive support services.

Our highly experienced and well trained staff know exactly what is the best way to protect your premises and will be able to recommend the right security equipment for the job.

MONITORING YOUR SYSTEM

If you have invested in a professionally installed monitored system from Classic Security Solutions, you've had the foresight to realise that a traditional "bell on the wall" isn't good enough, but have you analysed the reliability of the link between your alarm system and the people that have to react to your needs.

Our Alarm Receiving Centre is **operational 24hrs a day 365 days a year** ready to respond to signals from your security systems.

Whether from your intruder alarm, fire alarm, sprinklers, heating, water, lighting or any of a limitless number of other electronic systems, our Alarm Receiving Centre is always ready to respond appropriately and quickly to your emergency.

Most monitored systems depend on equipment that dials the **Alarm Receiving Centre (ARC)** when an incident occurs. If the telephone line is damaged, then the message doesn't get through. Even an engaged phone line or exchange can leave your premises vulnerable. RedCARE GSM solves these problems.

*we are ready to respond appropriately
and quickly to any emergency*

020 8507 7771
www.classicUK.com

MONITORING YOUR SYSTEM

RedCARE GSM

RedCARE GSM is the latest and most secure remote signalling system available. It works by monitoring your premises via two completely separate network paths: The BT RedCARE network and Celnet's GSM (Global System for Mobile) radio network. RedCARE guarantees your premises become an anxiety free zone, providing you with **complete peace of mind**. Many insurance companies will offer a discount on annual premiums if RedCARE GSM is providing the security for your premises.

Everything considered, when Classic Security Solutions installs RedCARE you can rest assured that you have one of the **worlds most secure** signalling networks. Moreover you can use your phone line to make and take phone calls in the normal way. So, while RedCARE is busy helping to protect the premises, it will be business as usual!

KEYHOLDER RESPONSE

It's 3am and you're told that an alarm has activated at your premises:

- Do you want your staff disturbed at home?
- Are they able to respond safely?
- How quickly could they respond?
- Have they received any training in alarm response?
- Is it fair to ask them to risk disturbing an intruder?
- Will they have to wait for an engineer?
- Will they be able to give 100% after a disturbed night?
- What happens when they are sick?
- Or on holiday?
- Or out for the night/weekend?
- Or it's Christmas?

You can forget these concerns by using our keyholder and response service.

We use a national network of Response Officers who are **vetted, trained and always available**.

Simply give us the keys and the alarm codes, both of which will be held under strictly secure conditions, and we will do the rest.

24 hours a day 365 days a year
Classic is your own personal emergency service

020 8507 7771
www.classicUK.com

KEYHOLDER RESPONSE

Response Service

When your alarm activates we will despatch an officer with their keys to investigate the cause, liaise with the police, arrange for your alarm to be reset and leave you a report of the incident. We can, if required, arrange for emergency boarding up or other services. Your staff will not be disturbed unless there has been a serious incident.

The alarm response service need not be limited to attending to intruder alarms – process alarms, plant alarms, lone worker alarms also require investigation.

A speedy reaction can avert very serious consequences!

CCTV surveillance is having a dramatic impact on successful crime prevention and detection. It's increasing popularity and major advances in technology have made CCTV an affordable option.

For the criminal there is no greater deterrent than the knowledge that they may be *"caught on camera"*, this in itself is enough to reduce incidences of crime. The police service recognises the importance of the evidence, which can be obtained via a good quality CCTV system and puts great emphasis on its value in the detection and prevention of crime.

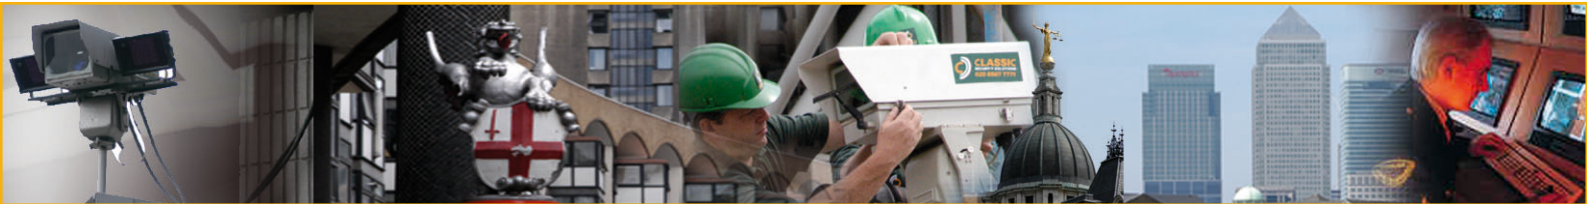

There has been a large increase in the number of CCTV surveillance systems in recent years. Such systems are rapidly becoming the norm rather than the exception and the benefits in terms of *peace of mind and security* that they bring are impossible to ignore. Whether you require a state of the art integrated system to protect a premiership football stadium, anti vandal street surveillance, or simply want to monitor your stock or till, you can do no better than talk to the leaders in the field, Classic Security Solutions. We have the *experience and expertise* necessary to professionally design, install and maintain the ideal CCTV system to meet your specific requirements and budget.

Digital recording system

Classic Security Solutions are leaders in the field of CCTV and we can design a digital recording system to **suit your needs and budget** whatever size your system is. Digital recorders allow the footage from the camera's to be stored on hard disk. This has several advantages including better quality images. There is no need to change tapes daily. **Major cost savings** can be made as there is no need to replace videotapes annually and there is no VCR to service.

A digital recorder can store 31 days of video footage at a time. When it starts to record day 32, it will record over day 1 and so on. This can simply be left recording with **little or no input required from staff** on site. If there is an incident that requires reviewing security camera footage this can be done simply at the press of a button. The system is so sophisticated it can continue to record live CCTV images even when playing back, without interruption.

ACCESS CONTROL

Classic Security Solutions can cater for all your access control needs. Our experts hand pick and rigorously test the most advanced, state of the art systems and equipment available. As DDA (*Disability Discrimination Act*) specialists we are able to modify and upgrade your existing systems to comply with the current disability discrimination act legislation.

Door entry systems

Whether your need is solely for a small single, audio only door entry system or a large multi site, Computer controlled audio/visual system. Classic have the knowledge and experience to provide you with the ideal solution to meet your needs and ***suit your budget.***

You can rely on our experts for professional advice and an integrated approach.

Your system can be made vandal resistant for high risk areas. Panels can be provided in a range of materials to suit your location and decor. When we provide you with a system, not only can you rely on our 24/7 back up service for your peace of mind but your system is fully expandable too. So if in the future you find you want to restrict access to further area's or require additional handsets to allow other members of your staff to answer callers from their desks, no problem. Our systems are designed to ***expand with your business.***

**Automated Access
puts you in control**

ACCESS CONTROL

putting you in control

Automatic Barriers

When vehicular access to your premises needs to be controlled or restricted to authorised users only, you can do no better than come to the experts. At Classic Security Solutions, helpful and informative advice and guidance is only ever a phone call away. We can provide you with anything from simple automatic car park barriers, to high security hydraulic gates, to MOD spec ram proof systems.

We can even provide wireless radio fobs to *open your gates for you* whilst you stay in your car and restrict access to certain area's of your premises to authorised staff only.

Access control system can be operated via the telephone. This means that you can speak to a caller and control your doors or gates from your mobile phone, regardless whether you are at the premises or in another country.

All of our access control solutions can be fully integrated with your CCTV, Intruder or computer network systems. Whatever your need we have the solution.

INTEGRATED SYSTEMS

A first class security system can be most effectively achieved through the *integration of a combination of different systems and technologies*. The interaction of these systems provides more effective operation and means fewer resources are needed for each respective system.

We excel in the field of total security management.

At Classic Security Solutions we have the expertise to link all kinds of technology spanning the security spectrum.

For example, we can link together CCTV, access control, intruder alarms and fire detection systems to ensure the best possible integrated security system to suit your budget.

You can use your telephone to open doors, radio code secure key fobs to set and unset your intruder alarm system and to open your gates. We can even provide multi television systems that switch on and off automatically as you walk from room to room.

The limit is your imagination and budget. Whatever you need or want, whether it's been done before or completely new, talk to Classic Security Solutions first. We are the people to provide the ideal solution for you. Remember with Classic, *help and advice is only ever a phone call away*.

*an integrated approach
for an integrated world*

INTEGRATED SYSTEMS

- Intruder alarms that summons the doctor
- Access control that control the CCTV
- CCTV systems that can be viewed from anywhere in the world
- Intruder alarms that can be interrogated from our offices
- Intruder alarms that can log staff activity
- Remote CCTV monitoring of your premises off site by our alarm receiving centre

ANTI-THEFT SMOKE

A smoke fogging device

The theft of state-of-the-art computer equipment is regrettably all too commonplace these days. It's very much on the increase too. If you have been targeted already the chances are that statistically you're likely to be a victim again.

You may already have security equipment in place, but false alarms do happen and the police will now scale down their response. This makes it even easier for thieves.

Once again Classic Security Solutions can provide you with *the ideal solution to protecting your computer hardware* - *Anti-Theft Smoke*. A smoke fogging device fitted to your existing alarm system, Anti-Theft Smoke cleverly gives your premises *a greater degree of protection from thieves*.

A full live demo can be viewed on our website at:
www.classicUK.com/smoke

*one of the only automated active
defence mechanisms legally available*

020 8507 7771 15
www.classicUK.com

ANTI-THEFT SMOKE

Automated active defence mechanism

Once your alarm is activated, the Anti-Theft Smoke unit immediately produces a vapour cloud, which effectively reduces visibility to just 30cm! (Glycol-based it is **harmless to people, animals and property**) The intruder is thus unable to see what they have been trying to steal. They will be shocked and disorientated by the experience too.

Should the density of the smoke drop before deactivation, a Smoke Sensor will see this and reactivate the unit. Your property continues to be protected until an authorised person switches off the alarm.

Easily portable digital cameras, desktop & laptop PC's, printers and scanners are especially vulnerable to theft. Loss of PCs and Apple Macs can mean the loss of valuable data. This is not just inconvenient, but could also lose you business. So don't delay call Classic Security Solutions and protect your business with our Anti-Theft Smoke system.

What you can't see you can't steal!

30 seconds

NURSE AND WARDEN CALL

Whether you need a simple radio pendant to warn you if an elderly or infirm relative requires assistance or you want a state of the art patient warning system for the largest hospital in Europe, Classic Security Solutions are the **right people to talk to.**

We specialise in installing, servicing and maintaining all types of nurse call systems. We can provide pagers, waterproof pendants, wireless or hard-wired call buttons, even ocean going systems to warn of personnel overboard.

If required we can link emergency warden call systems direct to a telephone line to provide off site monitoring, creating a more flexible response environment

Among our clients we have many local authorities facilities and EPH (Elderly Persons Home) that rely on our expertise to keep their systems in good working order and protect their clients. We will be happy to provide you with a new system or keep your existing system in tiptop condition through our **regular service and maintenance program.** If you require nurse/warden call, call Classic Security Solutions.

*help at hand
means you're never alone*

020 8507 7771 17
www.classicUK.com

NURSE AND WARDEN CALL

Our nurse call systems are aradio based for visually and audibly alerting nursing staff to calls from patients or other members of staff. Because it is radio based, it is infinetely expandable depending on your requirements at a given time.

Almost none of the considerations and constraints inherent in a conventional hard wired system apply because there is virtually no wiring, plus installation causes minimum disruption to your premises and therefore to your staff and patients.

Your system can be as small or as large as you want, as each nurse call system is configured to suit individual requirements. Classic Security Solutions would be able to advise you on the best setup for your organisation.

FIRE ALARMS

An outbreak of fire is a harrowing and shocking ordeal for all involved. Ensuring your premises have the most efficient fire alarm system should be a priority for everyone.

Employers now have a legal responsibility under the fire precautions (workplace) regulations, to provide a workplace environment that has adequate fire protection measures to *safeguard the health and safety of employees*.

A fire prevention and detection system is no longer an option it's a necessity. Why? Because they *save lives*.

Every year hundreds of people die in fires in the home or commercial world, thousands are injured. The amount of damage done to property by fire is huge, with costs running into hundreds of millions of pounds. Classic Security Solutions are available to help you choose the ideal fire alarm system for your property. Our experts can tell you exactly what protective devices and detection equipment you require to protect your employees and meet with current standards.

*save lives
and property*

020 8507 7771 19
www.classicUK.com

FIRE ALARMS

prevention, protection, peace of mind

Fire doors within the premises can be held open with magnetic door stays to provide easier day-to-day access. When the fire alarm is activated the magnetic door stays release automatically, allowing any fire doors to close and prevent the spread of fire and smoke.

If you have unusual or hazardous area's within your premises, no problem. Here at Classic Security Solutions we have a wealth of experience in dealing with fire detection and prevention in area's of this kind.

When it comes to protecting peoples lives ***don't settle for second best***. By choosing Classic Security Solutions you can rest assured that you will get the best system available to meet your needs and budget.

But we don't stop there. Fire alarms should be serviced regularly to ensure that all detectors, call points, sirens and other devices are functioning correctly. Our backup maintenance and service team are second to none. We can handle all the testing and scheduling for you. Our ***"One stop shop"*** service is designed to do all the work for you, relieving you of the burden and ***saving you time and money***.

CLIENT TESTIMONIALS

“Giving customers personal attention is very important in every successful business. Classic Security Solutions provide us with a quality service that is both personal and reliable”

Daniel Sugar - Amsprop Estates Limited

“Classic Security Solutions are a company that care about their customers. They provide a reliable and efficient service. They want to deliver.”

London Borough of Camden

“I feel that Classic genuinely care about their customers and they provide that personal touch that is sadly lacking in the UK today.”

A premiership football club

“Being responsible for many buildings, it is a comfort to have just one company that specialises in all security technologies. This means I can relax and don't have to co-ordinate different companies to communicate with each other and more importantly one telephone number to remember.”

Hooper Management (Dartford)

“We have utilised the services of Classic for the past twelve years. They have been informative and professional in all aspects. Their engineers have always been polite and courteous.”

Citi-Group (London)
